

EXPERIENCE THE DIFFERENCE. **EXPERIENCE PQR.**

PQR
QUALITY SOLUTIONS

www.pqr.net.au

SOLUTIONS DRIVEN

SOLUTIONS DRIVEN

noun - the method or process of solving a problem

'Driven' verb - motivated by or having a compulsive quality or need

Strategic Consultation

PQR delivers a high level strategic consultation service to assure project outcomes and mitigate risk. We are able to work with clients across the full cycle of a project, from planning and implementation to fabrication and coating, and project close out documentation deliverables.

+

Industry Best Inspectors

PQR's inspection team is amongst the most highly qualified, experienced and well supported in the industry. Stringent recruitment processes ensure our Inspectors deliver on all project critical requirements, timelines and outcomes.

Employer of Choice Status		*
Rapid Concentration of Resources to Achieve Critical Milestones		*

NATA (National Association of Testing Authorities) accreditation provides a means of determining, formally recognising and promoting the competence of facilities to perform specific types of testing, inspection, calibration, and other related activities. Accreditation is distinct from certification, which focuses on an organisation's overall compliance with systems and products standards rather than technical competence. PQR are a NATA Accredited Type A Inspection Company.

DEPENDABLE

adj - able to be depended on; reliable; trustworthy

PQR and trust go hand in hand; from the moment a client entrusts their project with us, our team will ensure those contractual deliverables will be met without fail. You can rely on PQR to go that extra mile to meet critical delivery deadlines, without sacrificing quality.

WHAT'S OUR DIFFERENCE?

PQR'S FOUNDATION

PQR is a highly focussed West Australian based Quality solutions consultancy that provides world class inspections and quality consulting services to projects throughout the Asia Pacific. PQR has been founded on a passionate and stable service experience that delivers an unrivalled, dependable and results driven partnership each and every time.

MEASURABLE VALUE

We are passionate about getting projects across the line and the combined knowledge of our consultant strategists and hands on skills and competency of our inspection team, delivers significant and measurable impacts. Where PQR works in a strategy consultant capacity, we can identify potential quality and/or schedule issues prior to a project kicking off. When you consider the increasing levels of project liquidated damages against a nominal investment in PQR's services, the value proposition is clear.

TECHNICAL SUPPORT

With PQR, companies needing general or specialist inspection services will benefit from greater execution of project deliverables, increased gratification of project milestones, and management endorsement on project deliverables.

THE RIGHT PEOPLE

We recognise that like our clients, inspectors are our lifeblood and they are critical to the PQR service proposition. Our inspectors are never treated as a commodity. We know our reputation is on the line as much as theirs. At the cornerstone of our success is PQR's recruitment and retention strategy. This process starts with an investigative assessment developed in response to industry consultations. PQR's ongoing training combined with a highly diverse and technically experienced support network ensures PQR inspectors consistently uphold our reputation for excellence.

PQR's reputation for excellence in quality project solutions underpins our success; a PQR approved inspector has the right experience and skillset to ensure project deliverables are met. PQR's consulting capabilities and determination to pre-empt and solve problems fills a void within the industry for an all-inclusive quality solutions provider.

INSPECTION & CONSULTING SERVICES

INTERNATIONAL AND AUSTRALIA-WIDE

NATA Accredited Services

INSPECTIONS

- Welding Inspections
- Coating Inspections
- Expediting
- In-Service Inspection of Storage Tanks

CONSULTING

- Producing, Qualifying Weld Procedures and Welders
